INKFROG – EBAY TEMPLATES

INSERTING EBAY TEMPLATES

This tutorial will explain to you in just a few steps how you can store eBay Templates in the software of your Middleware provider.

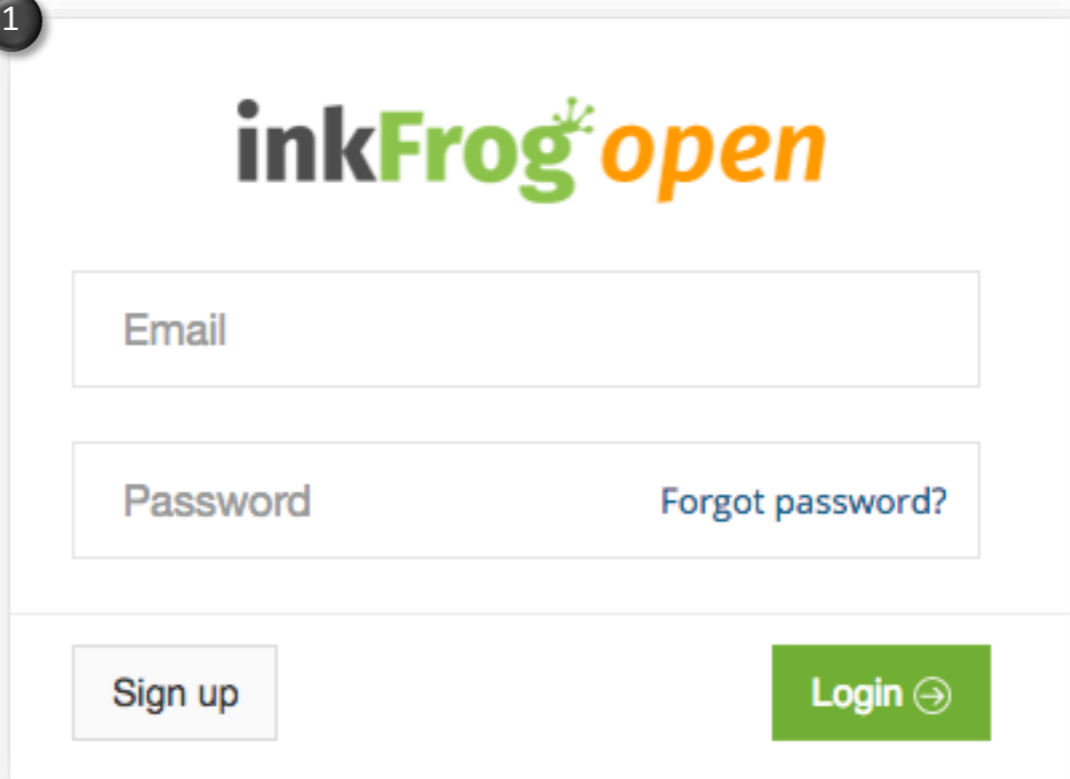

Please examine in the first step if you have met all requirements. Then follow the instructions of the tutorial.

INSERTING EBAY TEMPLATES

(1) Open the InkFrog homepage and log in with your access data.

1

inkFrog⁺open

Email

Password [Forgot password?](#)

Sign up

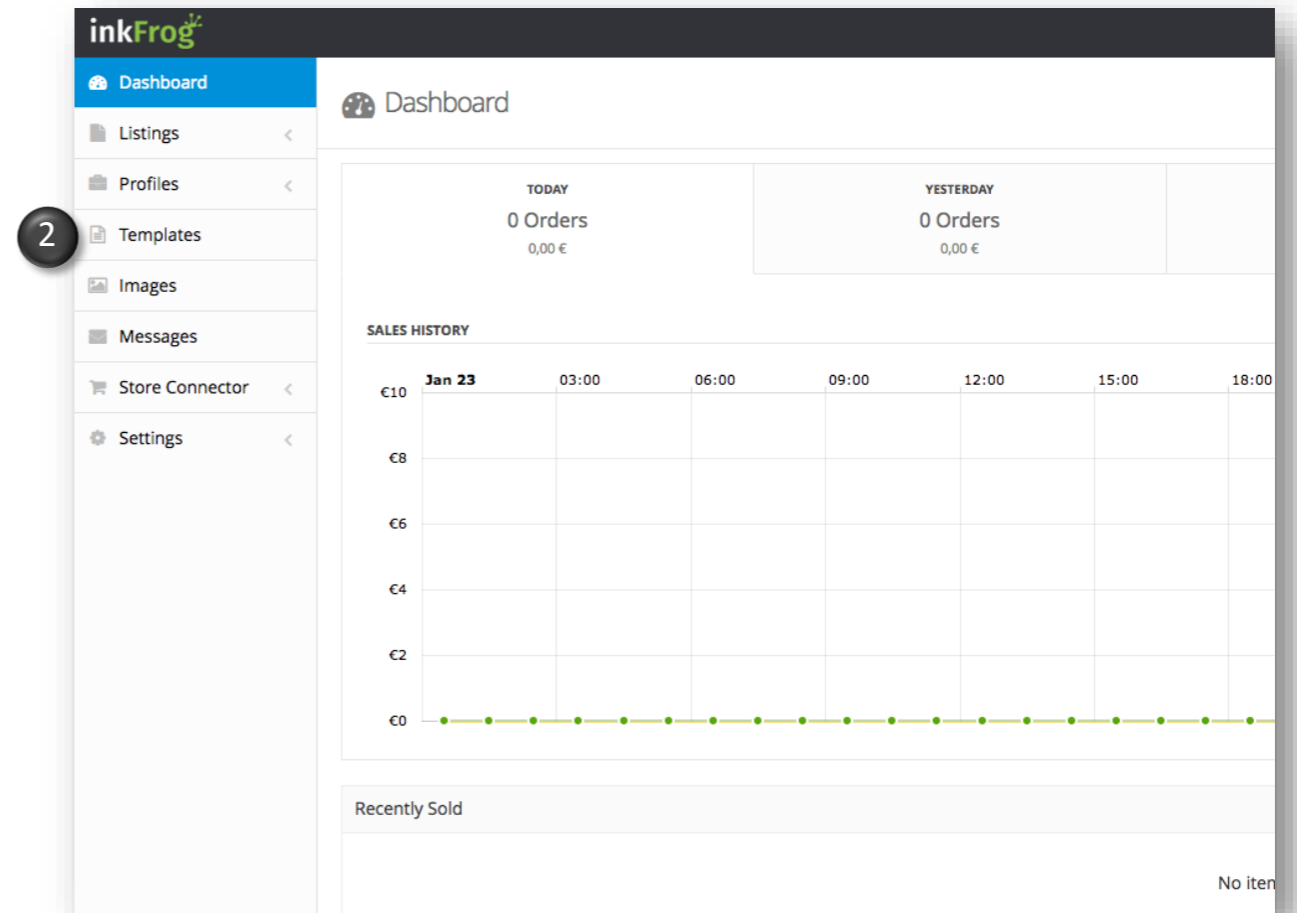

Login →

INSERTING EBAY TEMPLATES

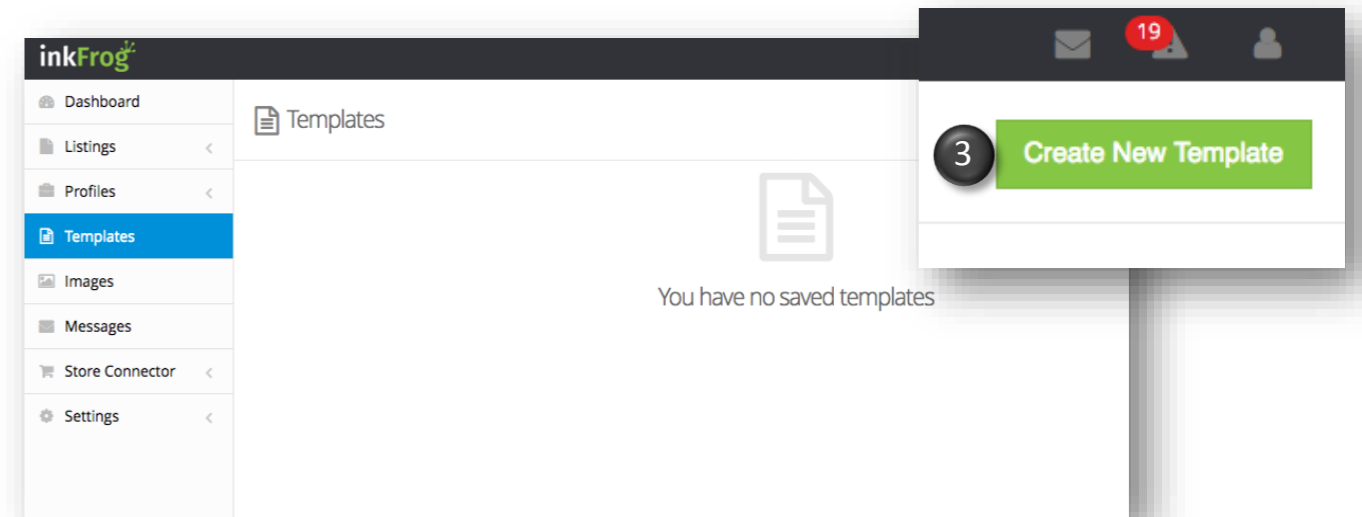

Now you find yourself in the Dashboard View of InkFrog.

(2) Click on the Tab **Templates**.

INSERTING EBAY TEMPLATES

(3) Click in the following window on the button **Create New Template**.

INSERTING EBAY TEMPLATES

(4) Now click on the link **I want to use my own HTML**.

Create New Template ×

What type of template would you like to create?

I want to make one with inkFrogs amazing designer.

4 I want to use my own custom HTML.

INSERTING EBAY TEMPLATES

In the following view you will find the HTML Code View.

(5) Open your created Template file with a text editor.

Now overwrite the existing HTML Code with the code from your created Template file.

(6) Store the inserted HTML Code with one click on the disk symbol.

5

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4   <title>{{ title }}</title>
5 </head>
6 <body>
7   <h1>{{ title }}</h1>
8   <div>
9     {{ description }}
10  </div>
11  {% for image in images%}
12  <a href="{{ image.url }}"></a>
13  {% endfor %}
14 </body>
15
16 </html>
17
```

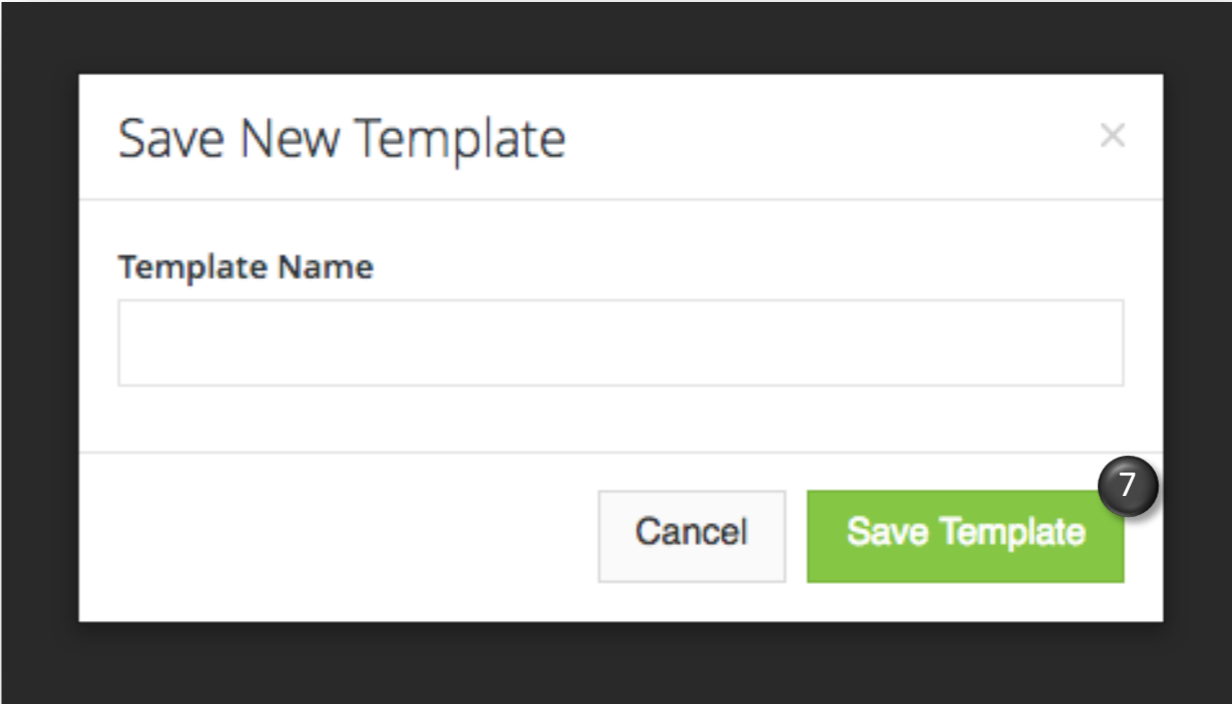

6

```
1 <meta http-equiv="Content-Type" content="text/html; charset=UTF-8" />
2 <meta name="viewport" content="width=device-width, initial-scale=1" />
3 <link media="all" href="http://statictpl.i-ways.net/ebay_fashion/template/v1/base.css" type="text/css" rel="stylesheet">
4 <link media="all" href="http://statictpl.i-ways.net/ebay_fashion/template/v1/50622f81-fa8a-4b7e-907e-4b5bb9a03ad0/skin.css" type="text/css" rel="stylesheet">
5 <div id="it--header">
6   <div class="it--wrapper">
7     <a class="it--logo"></a>
8     <div class="it--slogan"></div>
9   </div>
10 </div>
11 <div id="it--content">
12   <div class="it--wrapper">
13     <div class="it-clearfix">
14       <div class="right">
15         <div class="image"></div>
16       </div>
17       <div class="left">
18         <h2 class="title">{{ title }}</h2>
19         <div class="description">{{ description }}</div>
20         <div class="attributes">
21           </div>
22       </div>
23     </div>
24     <div class="promo"></div>
25   </div>
26 </div>
27 <div id="it--footer">
28   <div class="it--wrapper">
29     <a class="it--logo"></a>
30     <div class="it--slogan"></div>
31     <div class="it--description"></div>
```

INSERTING EBAY TEMPLATES

(7) Now give the created Template a title and save by clicking on **Save Template**.

Save New Template

Template Name

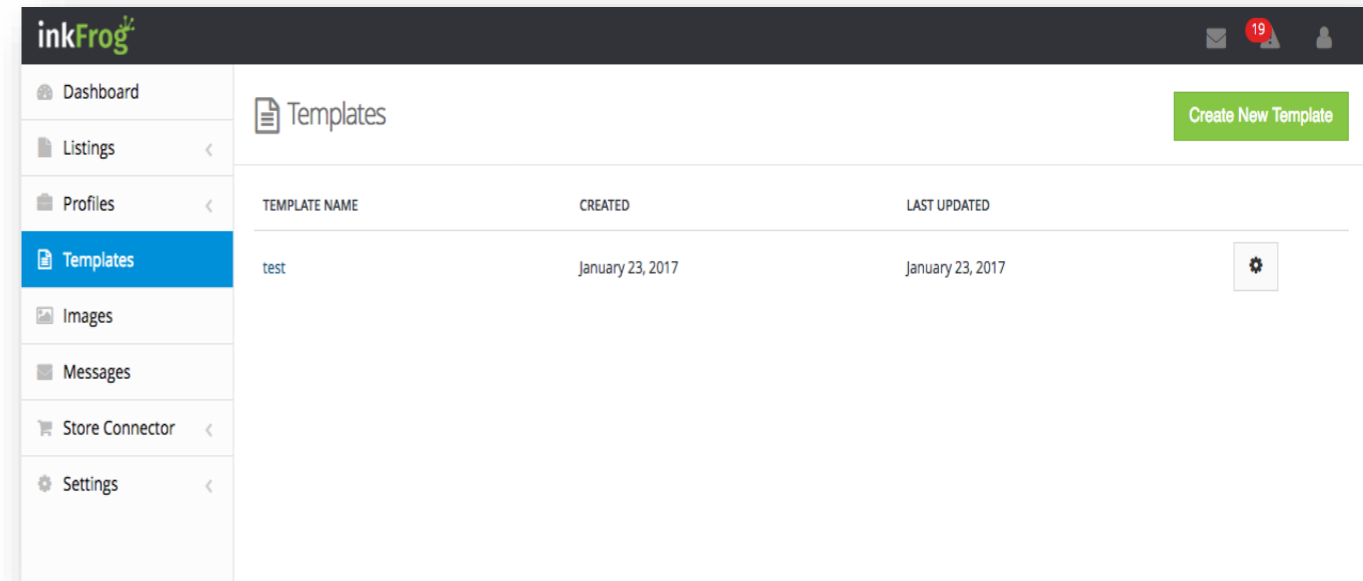

Cancel Save Template

7

INSERTING EBAY TEMPLATES

Hence, your eBay Template has been successfully stored and can now be used.

The screenshot shows the inkFrog web interface. The left sidebar contains navigation links: Dashboard, Listings, Profiles, Templates (highlighted), Images, Messages, Store Connector, and Settings. The main content area is titled 'Templates' and features a 'Create New Template' button in the top right. Below the button is a table with the following data:

TEMPLATE NAME	CREATED	LAST UPDATED	
test	January 23, 2017	January 23, 2017
